

PROCEDURE DATE	ACCESSION	PHYSICIAN	PATIENT NAME	PATIENT DOB	GENDER	CLINICAL HISTORY	BIOPSY LOCATION(S)	ICD-9 CODE(S)	DIAGNOSIS 1
1/4/11	GIP-11-001	Dr. Sample2	SAMPLE, PATIENT 1	7/13/41	F	High risk colon cancer surveillance; personal history of colonic polyps; last colonoscopy : 2007.	A.TERMINAL ILEUM ULCER BIOPSY WITH COLD FORCEPS, B.ASCENDING COLON POLYPECTOMY	211.3, 564.9	Villous blunting with deep neutrophilic cryptitis and hemorrhage in lamina propria. Morphologically, the features here favor NSAID injury.
1/4/11	GIP-11-002	Dr. Sample1	SAMPLE, PATIENT 2	3/3/43	F	Diarrhea	A.ILEUM, BIOPSY, B.COLON, BIOPSY	564.9, 564.9	Histologically normal ileal mucosa.Ileitis not identified.
1/4/11	GIP-11-003	Dr. Sample1	SAMPLE, PATIENT 3	8/15/18	F	Melena	A.RECTUM, POLYPECTOMY	211.4	Hyperplastic polyp of rectum.
1/4/11	GIP-11-004	Dr. Sample1	SAMPLE, PATIENT 4	7/5/65	F	Functional diarrhea; Change in bowel habits	A.ASCENDING COLON, BIOPSY	564.9	Histologically normal colonic mucosa.Colitis/microscopic colitis not identified.
1/4/11	GIP-11-005	Dr. Sample1	SAMPLE, PATIENT 5	7/1/38	F	Hematochezia.	A.RECTUM POLYPECTOMY	211.4	Tubular adenoma(adenomatous polyp), (rectum).
1/4/11	GIP-11-006	Dr. Sample1	SAMPLE, PATIENT 6	1/27/76	F	Dysphagia	A.GASTRIC ANTRUM, BIOPSY WITH COLD FORCEPS	41.86	Chronic antral gastritis, active with H. pylori present on silver stain.
1/4/11	GIP-11-007	Dr. Sample1	SAMPLE, PATIENT 7	8/2/71	M	Epigastric abdominal pain; established gastroesophageal reflux disease; chest pain (non-cardiac).	A.STOMACH BIOPSY WITH COLD FORCEPS, B.ESOPHAGUS BIOPSY WITH COLD FORCEPS	535.00, 530.11	Reactive gastropathy. Silver stain negative for H. pylori.
1/4/11	GIP-11-008	Dr. Sample2	SAMPLE, PATIENT 8	4/3/52	F	Generalized abdominal pain; functional diarrhea; change in bowel habits.	A.ASCENDING COLON BIOPSY	564.9	Histologically normal colonic mucosa.Features of microscopic (lymphocytic/collagenous) colitis not identified.
1/4/11	GIP-11-009	Dr. Sample1	SAMPLE, PATIENT 9	12/2/30	M	Screening for colorectal malignant neoplasm.	A.ASCENDING COLON POLYPECTOMY	211.3	Tubular adenomas (adenomatous polyps) of colon, negative for high grade dysplasia or malignancy.
1/4/11	GIP-11-0010	Dr. Sample1	SAMPLE, PATIENT 10	5/27/56	M	Heme positive stool, iron deficiency anemia.	A.TRANSVERSE COLON, BIOPSY	211.3	Colonic mucosa with distortion of crypt architecture and fibrosis of lamina propria.Definitive evidence of malignancy not identified on numerous sections examined. See comment.
1/4/11	GIP-11-0011	Dr. Sample2	SAMPLE, PATIENT 11	8/8/42	M	Follow-up of benign duodenal tumor	A.DUODENUM/AMPULLA, BIOPSY WITH COLD FORCEPS	537.9	Histologically normal small bowel mucosa.No morphologic evidence of gluten sensitive enteropathy (sprue).Giardia not identified.Residual adenoma is not identified.
1/4/11	GIP-11-0012	Dr. Sample1	SAMPLE, PATIENT 12	9/24/46	M	Dyspepsia	A.GASTRIC ANTRUM, BIOPSY WITH COLD FORCEPS	535	Reactive gastropathy. Silver stain negative for H. pylori.
1/4/11	GIP-11-0013	Dr. Sample1	SAMPLE, PATIENT 13	8/16/44	F	Epigastric abdominal pain, nausea.	A.ESOPHAGUS, BIOPSY	530.81	Gastric cardia showing mild chronic superficial gastritis; silver stain negative for H. pylori.Columnar epithelial-lined (Barrett's) esophagus not identified; Alcian blue stain negative for intestinal metaplasia/goblet cells diagnostic of Barrett's esophagus.Esophageal squamous epithelium not present for evaluation.
